BANIPUR MAHILA MAHAVIDYALAYA
CELEBRATES
HIROSHIMA AND NAGASAKI DAY
ORGANIZED BY
DEPARTMENT OF GEOGRAPHY
IN COLLABORATION WITH
INTERNAL QUALITY ASSURANCE CELL

On 6th and 9th of August 1945, the United States detonated two atomic bombs over the Japanese cities of Hiroshima and Nagasaki, respectively. The aerial bombings together killed between 129,000 and 226,000 people, most of who were civilians, and remain the only use of nuclear weapons in an armed conflict. Japan surrendered to the Allies on 15 August, six days after the bombing of Nagasaki and the Soviet Union's declaration of war against Japan and invasion of Japanese-occupied Manchuria. The Japanese government signed the instrument of surrender on 2 September, effectively ending the war.

The first atomic bomb, named Little Boy, was dropped on Hiroshima from the Enola Gay, a B-29 bomber, at 8:15 AM on August 6, 1945. The second bomb, named Fat Man, was dropped on Nagasaki from the Bockscar, also a B-29 bomber, at 11:02 AM on August 9, 1945.

Within the first few months after the bombing... between 90,000 and 166,000 people died in Hiroshima, while another 60,000 to 80,000 died in Nagasaki.

The dropping of the atomic bombs on World War II on the city of Hiroshima and Nagasaki was a very important part of World War II. The atomic bomb ended the war between America and Japan. This was just one of the important events during the battle in World War II. The Battle at Pearl Harbor, where the Japanese attacked U.S. soil was also why the Americans bombed Nagasaki and Hiroshima. Some believe that the United States was correct in dropping these bombs on Japan because of the attack on Pearl Harbor while others believe that it was very wrong to drop the bomb.

FLASH OF LIGHT
WALL OF FIRE
AUGUST 6, 1945
The first atomic bomb, Little Boy, was dropped on Hiroshima, Japan, on August 6, 1945. The explosion created a fireball that incinerated most of the city. The fireball was so intense that it could be seen from miles away. The explosion also created a massive shock wave that flattened buildings and killed thousands of people. The explosion also created a massive fire that burned for hours, incinerating most of the city. The explosion also created a massive shock wave that flattened buildings and killed thousands of people. The explosion also created a massive fire that burned for hours, incinerating most of the city.

In addition to impeding national progress, it undermines social cohesion. It slows down the rate of human progress. Wars are not the answer to the world's issues. Instead, they cause issues and generate hatred among nations. War can settle one issue but creates far too many other ones.

BANIPUR MAHILA MAHAVIDYALAYA
DEPARTMENT OF ZOOLOGY
CELEBRATION OF WORLD SNAKE DAY

16th JULY 2023

IN COLLABORATION WITH INTERNAL QUALITY ASSURANCE CELL

SNAKE BITE

Prepare Now:

- Keep your surroundings clean. Do not let the trees and branches touch your walls and windows.
- Keep your home free from rats, frogs etc.
- Stay alert while working in crop fields and farms.
- While going outside during night do not forget to carry torch-light and a stick.
- Avoid places where snakes may live. These places include tall grass or bush, rocky areas, fallen logs, swamps, marshes and deep holes in the ground.
- Watch where you step and where you sit when outdoors.
- Avoid sleep on the floor. Sleep on beds or cots.
- Do not ever attempt to catch a snake.
- Use nets in windows and poultry firms.

Survive During:

- In case of snake bite, make sure the area is safe before you assist the person.
- Do not waste time, call for help and take the patient to hospital at the earliest.
- Reassure patient, offer comfort and try to keep the person calm. Do not leave the person unattended.
- Remove any rings, watches or tight clothing that may cut off the blood flow because of swelling.
- Try not to move the injured limb and eventually apply a splint (if you are trained on how to apply splints) to immobilize the affected part.
- Do not apply tourniquet.
- Do not try to suck the venom out of the wound, do not bleed the wound, do not put ice on the bite and do not rub herbs on the bite.

Be Safe After:

- Note that not all snakes are poisonous, not all poisonous ones are lethal, but one should always be careful with snakes. All snake bites should be treated as if they are poisonous bites.
- Remember, traditional therapy has no proven benefit in the treatment of snake bite. Do not waste time and send the patient to hospital at the earliest.

SNAKE BITES: DO'S AND DON'TS

Do	Don't
Stay calm	Don't apply a tourniquet or a constriction band
Call 911 immediately to be evaluated	Don't apply ice; it can cause local tissue damage
Take off anything constricting the area, such as a ring or watch	Don't apply heat
Position the affected area at or above heart level. If you are bitten on the hand, bring it to heart level, and if you're bitten on the leg or foot, elevate it if possible	Don't cut the affected area and attempt to suck the venom out
Go to the emergency room - the sooner the better	Don't use a commercially available extraction device
	Don't use electrical therapy
	Don't apply any type of lotions or ointments
